

For Oklahomans with Disabilities

FREE

special alert

SMOKE ALARMS

installed in your home by professionals

*Be alerted to a simple problem
like this before it becomes
a very serious situation!*

A collaborative program of Oklahoma ABLE Tech,
Oklahoma Assistive Technology Foundation,
Fire Service Training and Fire Protection Publications at
Oklahoma State University and the
Federal Emergency Management Agency (FEMA)

This opportunity is available to ALL Oklahomans with a hearing, vision, mobility or other disability - young and old, located anywhere in the state!

Please pass this card along to your family members, neighbors, church family, etc.

For the fifth consecutive year, the Oklahoma Assistive Technology Foundation (OkAT) has been awarded a grant from the U.S. Department of Homeland Security, Federal Emergency Management Agency (FEMA) to install **FREE** smoke alarms and alert equipment in the homes of individuals with a documented disability of:

- deaf or hard of hearing
- use of a mobility device (a cane, wheelchair, or motorized scooter, etc.)
- blind or low vision

To qualify, submit a 1-page application. It can be filled out online at <http://bit.ly/1TWi902> or download a PDF to fill out and mail in from this same page. Applicants must have someone attest to their disability as part of their completed application. This person does not have to be a physician.

When the application is approved, a professional installer is scheduled (at the resident's convenience) to properly place the alarms in the home.

Multiple smoke alarms will be installed to meet national standards. Specialized alarms, with a bed shaker, are installed to alert individuals who are deaf or hard of hearing.

Eligible individuals may also receive an alarm with a strobe light to meet their unique needs.

Installers also assist with planning a home fire drill and offering a home safety survey to prevent fires, burns, falls, and other common home injuries.
